

Home Exercise Program for Subscapularis Strengthening

Internal rotation – With your elbow bent and your arm at your side, rotate your arm across your body against the resistance of a theraband. Slowly return to the start position and repeat. Keep your elbow at your side

Internal rotation with abduction - Attach your theraband to the doorjamb well above your head. Turn your back to the door. With your elbow bent at 90 degree angle and your arm out to your side rotate your arm down, so that your hand is even with your hip, against the resistance of a theraband. Slowly return to the start position and repeat.

Reverse Lawn mower starter - Attach your theraband in a doorjamb well above your head. Turn so you are parallel to the door. Start with the arm above your head and out to the side. Then pull the band up towards your opposite pocket in the reverse motion of starting a lawn mower.

Bear hugs- Attach your theraband to the doorjamb well above your head. Facing the door hold your arm out in front of your body, elbow bent at 90 degrees. With the band in your hand, pull it towards your opposite shoulder as though you were giving someone a hug around their neck.
