Physical/Occupational Therapy Prescription

Name:		_Date of Birth:	
Diagnosis:	Scapulothoracic Bursitis	_Code:	M75.80
Procedure:	Arthroscopic Scapulothoracic Bursectomy	Surgery Date:	

Instructions:

Range of motion:

- -Sling for comfort only for the first 48 hours after surgery.
- Begin immediate passive and active range of motion without restriction, including scapular protraction and retraction and progress as tolerated.

Strengthening:

- Ok to begin strengthening including the scapular stabilizers as soon as full symmetric active range of motion is recovered, which typically occurs at four weeks post-operatively.
- Plan for return to full occupational and athletic activity at six weeks post-operatively. -

Limitations:

No specific limitations.

Please provide a home exercise program with a focus on scapular posture and strengthening of the scapular retractors and force couple.

Modalities

Heat before and ice after therapy. Other modalities per therapist.

Frequency: 3 times/week	Duration: 6 weeks
